COVER LETTER

Date - 05/23/2026

Dear Hiring Team,

Strong children's products succeed when trend-driven creativity, thoughtful design execution, and cohesive visual storytelling come together to create memorable customer experiences. Designing seasonal assortments and scalable product concepts that balance creativity, functionality, and brand consistency is what excites me most about the Associate Designer opportunity at The Children's Place.

With 2+ years of experience developing branded product concepts, Illustrator sketches, presentation boards, and production-ready visual assets, I have contributed to fast-paced design workflows requiring strong organization, collaboration, and attention to detail. My experience creating assortment systems, sampling documentation, and customer-focused visual concepts aligns closely with your team's focus on seasonal product development and cohesive brand execution.

At CX by Design and Lighthouse Info System, I developed scalable visual systems, concept presentations, and production-ready assets while collaborating with stakeholders to refine product direction, improve workflow consistency, and support implementation readiness. I also bring strong expertise in Adobe Illustrator, Photoshop, trend research, visual storytelling, and presentation development supporting consumer-focused product experiences.

What especially draws me to The Children's Place is the opportunity to contribute creative, trend-focused designs that bring joyful and cohesive experiences to families and children.

Warm regards,
Falguni Dekate
